

Bayer CropScience

2012 Bayer CropScience Support of Off-label Tank Mixes

To: All Western Canadian Customers

Subject: Use of unlabelled tank mixes of commercial class pest control products used for crop production or vegetation management

In 2010, Health Canada's Pest Management Regulatory Agency (PMRA) implemented changes that allow for the application of unlabelled tank mixes of commercial pest control products provided they are registered and applied within their respective registered use pattern. Accordingly, users of these products are permitted by the PMRA to apply unlabelled tank mixes of registered pest control products subject to the following conditions:

1. Each tank mix partner is registered for use in Canada on the crop of interest, including genetically modified crops.
2. The tank mix only includes an adjuvant when specifically required by one of the tank mix partner labels. If an adjuvant is not required on the label of any tank mix partner, then no adjuvant may be added to the tank mix.
3. The application timings of all tank mix partners are compatible with regards to crop and pest staging.
4. Each tank mix partner is applied in accordance with its registered product label (e.g. Directions for Use, Precautions, Buffer Zones, etc.). In cases where information on the tank mix partner labels differs between them, the most restrictive directions must be followed.
5. The tank mix is not specifically excluded or contraindicated on either tank mix partner label.
6. The use of the tank mix provides additional value to the user (e.g. increased scope of pests controlled, contributes to resistance management or integrated pest management, cost- or time-savings).

General precautionary statement:

In some cases, tank mixing pest control products can result in reduced biological activity (antagonism = reduced efficacy), or increased biological activity (synergism = increased host injury). If a grower uses, or if anyone including any retail, crop advisor, agronomist or provincial extension personnel makes a recommendation to use, unlabelled tank mixes not approved by Bayer CropScience in writing they are assuming all liability, and Bayer CropScience disclaims any liability, for:

1. Any antagonistic or synergistic effects of the unlabelled tank mixes; and
2. The use of the Bayer CropScience product.

What does Bayer CropScience support in relation to this new tank mix policy?

Bayer CropScience will only support the use of Bayer CropScience products with tank mixes presently listed on Bayer CropScience product labels or with the unlabelled tank mixes listed in this document.

Unlabelled tank mixes supported by Bayer CropScience

The use of Bayer CropScience products in the following unlabelled tank mixes is supported by Bayer CropScience:

HERBICIDES			
Herbicide Brand	Tank Mix Product	Crop	Precautionary Statements
Buctril® M	Tilt®	Spring, Durum and Winter Wheat, Barley, Oats	
	Traxos®	Spring and Durum Wheat	
	Sevin XLR	Spring, Durum and Winter Wheat, Barley, Oats	
Thumper®	Stratego®	Spring and Durum Wheat, Barley	
	Tilt	Spring and Durum Wheat, Barley	
	Decis®	Spring and Durum Wheat, Barley	
	Sevin XLR	Spring and Durum Wheat, Barley	
Pardner®	Sevin XLR	All crops that both products are registered on	
Centurion®	Odyssey®	Field peas, Seedling Alfalfa, Clearfield Canola, Clearfield Lentils	
	Headline®	Chickpeas, Dry beans, Lentils, Field peas	For specific dry bean cultivars consult product labels
	Proline®	Chickpeas, Lentils	
	Quadris®	Chickpeas, Dry beans, Lentils, Field peas	For specific dry bean cultivars consult product labels
	Quilt®	Chickpeas, Dry beans, Field peas, Lentils	

HERBICIDES cont.

Herbicide Brand	Tank Mix Product	Crop	Precautionary Statements
Centurion cont.	Decis	All crops that both products are registered on	
	Sevin XLR	All crops that both products are registered on	
Liberty®	Centurion	LibertyLink® Canola	With Liberty at 1.35 or 1.62 L/ac. rate apply Centurion at 50 mL/ac.
	Centurion + Decis	LibertyLink Canola	With Liberty at 1.35 or 1.62 L/ac. rate apply Centurion at 50 mL/ac.
	Centurion + Sevin	LibertyLink Canola	With Liberty at 1.35 or 1.62 L/ac. rate apply Centurion at 50 mL/ac.
	Decis	LibertyLink Canola	
	Sevin XLR	LibertyLink Canola	
Infinity®	2,4-D Ester	Spring, Durum and Winter Wheat, Barley	Add 2,4-D Ester at 140-280 g ai/ha (2-4 active ounces/acre). When mixing with a graminicide, addition of 2,4-D Ester may result in reduced grass control under drought conditions, heavy grass populations or advanced grass stages. With addition of 2,4-D minimum crop growth stage is 4 leaf.
	Axial® + Stratego	Spring Wheat	Temporary crop injury may be observed. If adding AMS adjuvant for enhanced weed control, do not tank mix with Stratego.
	Axial + Tilt	Spring Wheat, Barley	Temporary crop injury may be observed when AMS is included for enhanced broadleaf weed control.
	Horizon® + Stratego	Spring and Durum Wheat	Temporary crop injury may be observed. If adding AMS adjuvant for enhanced weed control, do not tank mix with Stratego.
	Lontrel™	Spring and Durum Wheat, Barley	
	MCPA Ester	Spring, Durum and Winter Wheat, Barley	Add MCPA Ester at 140-280 g ai/ha (2-4 active ounces/acre). When mixing with a graminicide, addition of MCPA Ester may result in reduced grass control under drought conditions, heavy grass populations or advanced grass stages.
	Puma® Advance + Stratego	Spring Wheat	Temporary crop injury may be observed. If adding AMS adjuvant for enhanced weed control, do not tank mix with Stratego.

	Traxos + Tilt	Spring and Durum Wheat	
	Stratego	Spring and Winter Wheat	If adding AMS adjuvant for enhanced weed control, temporary crop injury may be observed.
	Tilt	Spring, Durum and Winter Wheat, Barley	
	Decis	Spring and Durum Wheat, Barley	
	Sevin XLR	Spring and Durum Wheat, Barley	
Puma Advance / Puma ¹²⁰ Super	Barricade (Barricade SG + Perimeter)	Spring and Durum Wheat, Barley	
	OcTTain	Spring and Durum Wheat	Minimum of 4 leaf crop stage as per OcTTain label
	Tilt	Spring and Durum Wheat, Barley	
	Sevin XLR	Spring and Durum Wheat, Barley	
Tundra™	2,4-D Ester	Spring and Durum Wheat, Barley	Add 2,4-D Ester at 140-280 g ai/ha (2-4 active ounces/acre). The addition of 2,4-D Ester may result in reduced grass control under drought conditions, heavy grass populations or advanced grass stages. With addition of 2,4-D minimum crop growth stage is 4 leaf.
	MCPA Ester	Spring and Durum Wheat, Barley	Add MCPA Ester at 140-280 g ai/ha (2-4 active ounces/acre). The addition of MCPA Ester may result in reduced grass control under drought conditions, heavy grass populations or advanced grass stages.
	Lontrel	Spring and Durum Wheat, Barley	

HERBICIDES cont.			
Herbicide Brand	Tank Mix Product	Crop	Precautionary Statements
Tundra cont.	Stratego	Spring Wheat	Temporary crop injury may be observed. If adding AMS adjuvant for enhanced weed control, do not tank mix with Stratego.
	Tilt	Spring Wheat, Barley	Temporary crop injury may be observed when AMS adjuvant is included for enhanced weed control.
	Decis	Spring and Durum Wheat, Barley	
	Sevin XLR	Spring and Durum Wheat, Barley	
Varro™	Attain	Durum Wheat	
	Buctril M	Winter Wheat	
	OcTTain	Spring and Durum Wheat	
	Prestige	Spring and Durum Wheat	
Velocity m3	2,4-D Ester	Spring, Durum and Winter Wheat	Add 2,4-D Ester at 140-280 g ai/ha (2-4 active ounces/acre). The addition of 2,4-D Ester may result in reduced grass control under drought conditions, heavy grass populations or advanced grass stages. In Spring and Winter Wheat include AMS adjuvant when adding 2,4-D Ester. With addition of 2,4-D minimum crop growth stage is 4 leaf.
	Lontrel	Spring and Durum Wheat	
	MCPA Ester	Spring, Durum and Winter Wheat	Add MCPA Ester at 140-280 g ai/ha (2-4 active ounces/acre). The addition of MCPA Ester may result in reduced grass control under drought conditions, heavy grass populations or advanced grass stages. In Spring and Winter Wheat include AMS adjuvant when adding MCPA Ester.
	Stratego	Spring Wheat (not Durum)	Temporary crop phyto may be observed. Increasing water volume to 10 gal/acre will help minimize crop injury.
	Tilt	Spring and Winter Wheat (not Durum)	Temporary crop injury may be observed when AMS adjuvant is included for enhanced weed control.
